

Diamond Products

FDP

Fujimi Diamond Pellet

FDP is a pellet which makes optimum use of the special characteristics of resin and diamonds. This pellet makes tremendous contributions to total cost reduction by reducing processing time, increased yield rate of polished products, labor saving, improving the working environment, and simplifying the treatment of waste fluids.

FDW

Fujimi Diamond Wheel

FDW is a precision grinding tool suitable for lenses small diameters and deep curvatures. This pellet makes tremendous contributions to total cost reduction by reducing processing time, increased yield rate of polished products, labor saving, improving the working environment, and simplifying the treatment of waste fluids.

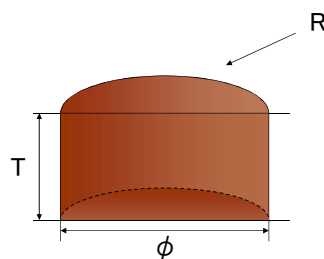

<Application>

Optical lens, Crystal glasses (Quartz, Fluorite, etc.), Ceramics, SUS, etc.

FDP Dimensions

<Size>

Diameter (ϕ) (mm)	Thickness (T) (mm)
4	2, 3, 5
5	2, 3, 5
6	2, 3, 5
7	2, 3, 5
8	2, 3, 5
10	2, 3, 5
12	2, 3, 5
14	2, 3, 5
16	2, 3, 5
20	2, 3, 5

Curvature(R): 5~ ∞

If you request the other sizes, please consult for your requirements

How to read the FDP codes

FDP	8	3	#1500	Resin	R20	凸/凹
	↓	↓	↓	↓	↓	↓
	Diameter (ϕ)	Thickness (T)	Particle size	Bond name	Curvature(R)	Contour
